Design Patterns Lecture

To Read

- Section 9.4 of *A First Course in Object Oriented Development*, but not the pattern *Template Method*.

Recording, Part 1

[Design Pattern Lecture, Part 1](#)

Content, Part 1

- [00:00](#) Introduction to design patterns
- [05:40](#) The Observer pattern
- [09:53](#) The coursebook example of Observer
- [11:39](#) Why Observer is needed in the coursebook example
- [15:17](#) Observer implementation in the coursebook example
- [36:06](#) Comments on the Observer pattern

Recording, Part 2

[Design Pattern Lecture, Part 2](#) ➞

Content, Part 2

- [00:00](#) The Strategy pattern
- [02:31](#) The coursebook example of Strategy
- [05:53](#) Strategy implementation in the coursebook example **The loop at line 80 in CarRegistry should have been removed when the strategy pattern was implemented, but was instead left. This is corrected in the git repository below.**
- [17:48](#) Comments on the Strategy pattern
- [20:43](#) The Factory pattern
- [21:42](#) The coursebook example of Factory
- [24:53](#) Factory implementation in the coursebook example
- [30:20](#) Comments on the Factory pattern
- [33:07](#) The Singleton pattern
- [37:45](#) Singleton implementation in the coursebook example

Recording, Part 3

[Design Pattern Lecture, Part 3](#) ➞

At about 12:30 a package private constructor is created, but it's by mistake given public accessibility instead of package private. Also, PromotingMatch shall return null on line 80 if no matching car is found. The call to PerfectMatch which was previously there is now done by the composite. Both these mistakes are corrected in the git repository below.

Content, Part 3

- [00:00](#) The Composite pattern
- [00:23](#) The coursebook example of Composite
- [02:09](#) More on the Composite pattern
- [07:53](#) Composite implementation in the coursebook example
- [19:20](#) Comments on the Composite pattern

Solutions to Exercises

Here's a git repository with the code that was written during the lecture, <https://github.com/KTH-IV1350/oodbook-examples-des-pat.git> ➞
