Polymorphism Lecture

To Read

- Section 9.1-9.2 of *A First Course in Object Oriented Development*.

Recording, Part 1

The same exception was by mistake included several times in the throws clause written at the end of part one. This is corrected in the beginning of part two.

[Polymorphism Lecture, Part 1](#)

Content, Part 1

- [00:00](#) Definition of polymorphism
- [01:59](#) Polymorphism example, the program before introducing polymorphism
- [06:34](#) Polymorphism example, find the public interface
- [09:46](#) Polymorphism example, extract an interface
- [21:19](#) Polymorphism example, class diagram
- [22:22](#) Polymorphism example, remove the dependency of the implementation
- [28:57](#) Polymorphism example, how to change implementation during execution
- [37:05](#) When to use polymorphism?
- [40:13](#) How to load a class file during execution (bonus content, not part of the course)

Recording, Part 2

[Polymorphism Lecture, Part 2](#)

Content, Part 2

- [00:00](#) Introduction to the polymorphism exercise
- [02:06](#) The code for the exercise
- [04:19](#) Polymorphism exercise, find the public interface
- [12:00](#) Polymorphism exercise, class diagram
- [21:03](#) Polymorphism exercise, communication diagram
- [28:28](#) Polymorphism exercise, code

Solutions to Exercises

Here are NetBeans projects with the code that was written during the lecture.

- [iv1350-polym-logger.zip](#) ↓
- [iv1350-polym-exe.zip](#) ↓

Here's the astah project that was created during the lecture, [polym-exe.astah](#) ↓
